

 **COSTA**® SPRING 2024

## BORN ON THE WATER<sup>®</sup>

It's true now, and it was true then: We'll do anything to stay on the water longer. In 1983, a group of anglers created Costa Sunglasses to stand up to the harsh light, unforgiving salt and rough conditions of a day at sea. The gear they made was up to the task, and it's been on the water ever since, inspiring all of us to See What's Out There<sup>®</sup>.

## BUILT BY HAND

The vast majority of Costas are built by hand in the USA. And we know that people who wear our sunglasses like to get after it, so when things happen to them that are not covered by one of our Limited Warranties, Costa has options to help get you back on the water.\*

\*See our website for terms, conditions and associated fees with our Limited Warranties and our repair program.

## BEYOND POLARIZED<sup>®</sup>

Most polarized lenses eliminate glare by filtering reflective light. But Costa's 580<sup>®</sup> lenses go further, filtering the perfect amount of yellow light and HEV blue light while enhancing reds, blues and greens. The result: less haze, less blur, greater contrast and greater clarity. Available in glass (580G) and a lightweight, impact-resistant polycarbonate (580P), it's like seeing in high definition.

## LOOKING AFTER WHAT WE LOVE

The more time we spend out on the water, the more inspired we are to protect it and its inhabitants. From our Kick Plastic<sup>®</sup> initiative to our Indifly Foundation, we devote considerable time and resources to conservation efforts that raise awareness, protect fisheries and enrich water-based communities.

# LENSES

We want you to See What's Out There<sup>®</sup>. That's what inspired us to bring you the first color-enhancing all-polarized glass lens. It's what keeps us pushing the sunglass industry forward with technology that provides 100% UV protection and goes beyond polarization to provide the ultimate in light management with our 580<sup>®</sup> lenses.

## POLARIZATION – NOT ALL POLARIZED LENSES ARE CREATED EQUAL

---

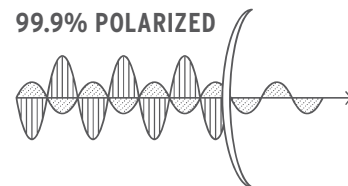

Polarized lenses are essential for anyone who spends time outdoors – especially on the water. But not all polarized sunglasses are created equal.

### **COSTA LENSES HAVE 99.9% POLARIZED EFFICIENCY\***

- + Utilizes the best polarized technology available
- + Provides comfort by eliminating reflective glare
- \* With the exception of our specialty Sunrise Silver lens.

### **COSTA SELLS ONLY POLARIZED SUNGLASSES**

- + Because we believe filtering reflective glare is essential for anyone on the water or outdoors, we sell only polarized sunglasses

## BEYOND POLARIZED<sup>®</sup> – COSTA 580<sup>®</sup> TECHNOLOGY

---

Costa 580 lenses were designed by in-house light spectrum experts to enhance colors, because other sunglass lenses fell short. The lens's patented technology manages light by:

### **FILTERING OUT YELLOW LIGHT**

- + For enhanced color, sharper contrast and higher definition

### **ENHANCING REDS, GREENS & BLUES**

- + Filtering yellow light at 580 nanometers on the visible light spectrum boosts the amounts of reds, greens and blues naturally, enhancing colors and contrast

### **ABSORBING HIGH-ENERGY VISIBLE (HEV) BLUE LIGHT\***

- + In addition to 100% protection from UV light, 580 technology also absorbs HEV blue light
- \* HEV blue light refers to the 380-430 nanometer range of the visible light spectrum.

**LIGHTWAVE® GLASS**  
SUPERIOR CLARITY &  
ULTRA SCRATCH-RESISTANT

**COSTA**  
**580G**

- + Glass provides the best clarity in material
- + Encapsulated mirrors (between layers of glass) are scratch-proof

POLARIZED FILM  
POLYCARBONATE LENS  
C-WALL® MOLECULAR BOND

## MIRRORED LENSES: NOT JUST GOOD-LOOKING

---

Our mirrors are more than aesthetic; they're a necessity in harsh sunlight. Made through a high-tech ion beam deposition process, these multilayered thin film coatings make for scratch-resistant mirrors.

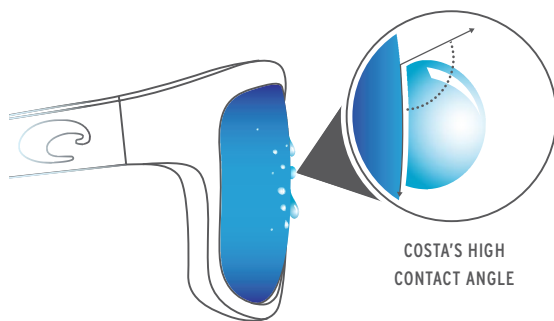

- + Reflect light away from the eye
- + Deliver incredible contrast
- + Scratch-resistant
- + Available in blue, green, sunrise silver, copper silver, gray silver and gold mirror

## C-WALL® — SCRATCH AND SMUDGE RESISTANT

---

The C-Wall is a molecular bond on our lenses to provide a scratch- and smudge-resistant barrier that repels sweat, water and oils for easier cleaning to help keep your vision clear.

Contact Angle: Fluids bead off the lens at a high contact point, allowing the droplets to roll off the lens.

An aerial photograph of a tropical coastline. The water is a vibrant turquoise color, transitioning from a lighter shade near the shore to a deeper blue further out. The land is covered in lush green vegetation, with some rocky outcrops visible. The sky is a clear, bright blue with scattered white clouds. The overall scene is bright and sunny, typical of a tropical beach destination.

# CHOOSING A LENS COLOR

## **DETERMINE WHERE YOUR CUSTOMER SPENDS THEIR TIME.**

Costa lenses were made with changing light conditions in mind. To get the most out of them, it's important to choose the right color. We offer ten lens colors in multiple lens technologies designed for everything from dawn to extremely bright light with blinding glare. Consider where your customer might spend their time to fit them with the best lens.

## BRIGHTEST LIGHT

NATURAL COLOR-ENHANCEMENT

**GRAY**  
Everyday base for the harshest sun conditions

**BLUE MIRROR**  
Open ocean and offshore fishing

**GRAY SILVER MIRROR**  
Offshore fishing, open-water sports, driving or any task in bright-light environments

## VARIABLE LIGHT

HIGHER CONTRAST

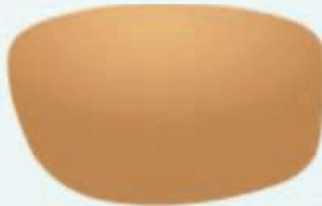

**COPPER**  
Everyday base for changing light conditions

**GREEN MIRROR**  
Inshore / sight fishing

**COPPER SILVER MIRROR**  
Inshore / sight fishing

**GOLD MIRROR**  
Rose base delivers a calming viewing experience across changing light conditions.

## MULTIPURPOSE

**ROSE GRADIENT**  
Offers a heightened contrast of your view, with hues of color as rich and warm as the sun you're under.

**GRAY GRADIENT**  
Provides a cool and familiar view to increase contrast and help you focus on what you're searching for.

## LOW LIGHT

**SUNRISE SILVER MIRROR**  
At dusk or dawn / On cloudy days  
(wNot suitable for driving)

# COSTA Rx<sup>®</sup>

Our prescription lenses offer the same performance you've come to expect from our regular 580 lenses. Throughout the design and processing of our 580P and 580G Rx lenses, the functionality of single-vision, bifocal and progressive prescriptions has been integral. Our Rx lenses are etched for authenticity and available in most of our frames from authorized Costa prescription dealers.

## WAYPOINT™ DIGITAL TECHNOLOGY

Over the years, we've invested heavily in our state-of-the-art processing lab to specialize in digital precision.

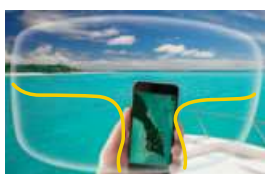

- + Costa Waypoint digital technology enhances the field of view by minimizing the peripheral blur common with wrap sunwear.
- + Waypoint lenses are customized for frame and vision needs.
- + All Waypoint orders include compensated prescription values to ensure amazing visual acuity for wrap sunglasses with high base curves.

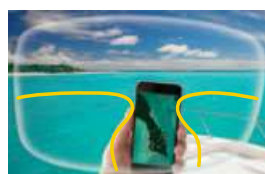

## COSTA PROGRESSIVE LENSES

Costa now has two progressive lens designs to choose from:

- + Costa C-SCAPE<sup>®</sup> design was developed with top sportfishing pros and lens designers for immediate adaptation, enhanced viewing fields and minimal peripheral blurring.
- + Varilux<sup>®</sup> Stylistic<sup>™</sup> design is available in Costa wrap frames for those patients with greater demand for a wider near field of vision.

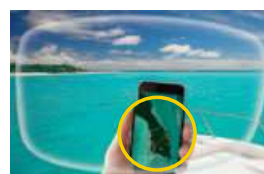

Costa C-SCAPE Progressive Lenses

Varilux<sup>®</sup> Stylistic<sup>™</sup> Progressive Lenses

## COSTA C-SCAPE<sup>®</sup> BLENDED BIFOCALS

We introduced the first backside round segment bifocal (22mm) with our Waypoint digitally compensated prescription specifically designed for wrap sunwear. C-SCAPE bifocals are perfect for the mature wearer who wants simple magnification for close-up tasks like reading outdoors or tying a fly. Our Waypoint technology ensures exceptional distance viewing fields.

Costa C-SCAPE Bifocals

# FRAMES

Customers can choose a frame based on color, materials, durability, lightness, cost and uniqueness. Each frame offers its own performance advantages and style features, for eyewear that fits every occasion.

## PROTECTING WHAT'S OUT THERE – THE BIO-RESIN RAW MATERIAL PROCESS

We recognize that every pair of sunglasses we make has an environmental and social footprint. This means that we search for the most durable, innovative and water-friendly materials available for our sunglasses. Sourcing materials that are able to withstand salt, sun and heat is challenging. In 2016, our product team introduced a new, high-performing material that used resin from the castor bean plant. Now, instead of using nylon sourced 100% from petrochemicals, all our nylon frames are made with a formula we call Bio-Resin™ that is partially derived from the plant. These frames are durable and lightweight, and hold their shape under harsh conditions. Frames that use our Bio-Resin™ have a smaller carbon footprint than traditional frame materials, and because it is sourced from a plant, contributes to carbon offset. Costa is an industry leader in converting our entire nylon frame line from traditional petrochemical plastic to include Bio-Resin™.

## THE **BIO** RESIN RAW MATERIAL PROCESS

## FRAME OPTIONS FOR EVERY NEED

### CO-INJECTED BIO-RESIN FRAMES

Our nylon frames are tough and durable, with more color options manufactured using the bio-resin process. TR-90 nylon is a premier material for sports and performance frames, as it is resistant to heat and cold. Though it is flexible, it is still durable. Nylon is easily molded into wraparounds and other shapes.

### BIO-ACETATES

Costa introduces Bio-Acetate to The Del Mar Collection; capturing the same watery spirit while marking one more step forward in our journey to reduce our impact on the watery world. Made from vegetable-based plasticizers and responsibly sourced wood pulp from FSC forests, the production of M49 emits 54% fewer CO2 emissions when compared with industry standard acetate.

### ACETATES

Best for when you're not active, acetate has a warm, luxurious feel and allows for very rich color layering, which creates vibrant, unique patterns. Made from tree pulp, acetate is naturally hypoallergenic and can be adjusted for your best fit. Acetate is special because it molds to your face over time, giving it that fitted suit, worn-in jeans, leather sandals feel.

### METAL FRAMES

Metal frames provide a different look and feel. We use only the best in metals – marine-grade, corrosion-resistant Monel® and lightweight, hypoallergenic titanium.

### COMBINATION FRAMES

If mixing it up is your thing, we combine the best of bio-based resin and acetate with our corrosion-resistant metals. The combination of materials also allows for more style variations.

### RIMLESS FRAMES

Rimless frames are feather-light because there is simply less nylon material sitting on your face. They're generally more comfortable, more streamlined and perfect for a variety of sports.

### NETPLUS™ RECYCLED FISHING NETS

We partnered with Bureo®, an innovative organization that works with fishermen around the world to recycle fishing nets, tracing the resulting NetPlus™ material through the recycling process where the nets are cleaned and pelletized before being turned into The Untangled™ Collection frames.

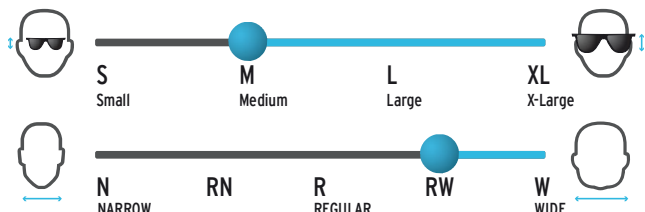

### COSTA SIZE AND FIT

The Costa sunglasses 'fit' guide is a range from Narrow, Regular to Wide (with most people choosing Regular). Fit is a combination of both the size of the sunglasses and the features of the frame, together. The features of our sunglasses influence the way the sunglasses fit, like the hinges and temple construction.

## COSTA SIZE AND FIT GUIDE

Size: The **size** of the **lens** on the front of the **face** - brow to cheek

Fit: The **fit** of the **frame** on your **head** - temple to temple

The fit also takes into consideration the flexibility of the frame material and hinge type.

## COSTA EYEWEAR CATEGORIES

---

Costa® has 3 main product categories, Performance, Lifestyle, and Hybrid, to ensure experiences on and off the water are enhanced to their fullest visual potential.

### PERFORMANCE

---

#### **FUNCTION FORWARD YOUR BIGGEST DAYS, YOUR BIGGETS FISH**

Like you, they excel in the toughest of elements. These styles are packed with functional features that create a competitive advantage for the waterman over any conditions they'll face.

### HYBRID

---

#### **UNDERSTAND UTILITY YOUR SHADES FOR ABSOLUTELY EVERYTHING**

Champions of versatility. Designed with a broad water-based lifestyle in mind, the all-new Hybrid Waterman collection of sunglasses are the go-to styles for adventurers who want to spend less time checking the weather conditions and more time jumping right in.

### LIFESTYLE

---

#### **COASTAL CULTURE YOUR TRAVELS, YOUR STYLE, OUR PLANET**

Whether you're spending a day at the beach with friends or immersing yourself in the culture & cuisine of a far away land, this collection of eyewear allows you to effortlessly express yourself and capture the essence of our blue world.

## PRO SERIES

---

The technology we've added into these classic Costa frames will help anglers stay out longer and fish harder. To help do that, we paid attention to the smallest of details. It only takes one small change to catch more fish. So we added 6:

### **EYEWIRE DRAINS**

Designed to help keep sweat and water from pooling up inside the frame, making sure there's nothing in the way of you and your next fish.

### **SWEAT MANAGEMENT CHANNELS**

Help to move sweat and water away from your eyes so you can see things like fish. Or structure holding fish. Just go fish.

### **IMPROVED HYDROLITE™**

Hydrolite is a rubbery substance that gets stickier the wetter it gets. Our new formula is more durable and more remora-like.

### **FULLY-ADJUSTABLE NOSE PADS**

Ventilated nose pads are fully adjustable for a customizable fit – designed to help reduce fogging so you see better no matter how hot it gets.

### **METAL KEEPER SLOTS**

Clip some keepers on and keep fishing instead of trying to look overboard for your Costas, which are hard to see without your Costas.

### **HOODING AND SIDE SHIELDS**

Rubber side shields keep light from leaking in and distracting you, so your focus stays fixed on finding fish.

## PATHFINDER SERIES

---

While these new frames may exude a relaxed exterior, just wait until you discover the performance-packed features beneath the surface in this collection. Comprised of Taxman, Grand Catalina, Lido, Ferg & Ferg XL, our pathfinder series delivers a unique, best-in-class feature set, designed to amplify any adventure on or around water. All Products in the Pathfinder Series share the same design language and functional attributes allowing you to excel in any environment with a fresh modernized look. Explore the features that set this collection apart:

### **FULL TEMPLE HYDROLITE**

Achieved through advanced engineering- provides maximum retention and seamless transitions between materials.

### **SIDE SHIELDS AND MICRO HOODING**

Prevent further light leak from top or side of frame.

### **SPRING HINGES**

Allow comfortable fit and increased retention across head shapes & sizes..

### **VENTED ADJUSTABLE NOSE-PADS**

Allows for customized fit across face shapes and promotes airflow to reduce fogging on interior of lens.

### **EYEWIRE DRAINS**

Designed to help keep sweat and water from pooling up inside the frame..

### **SWEAT MANAGEMENT CHANNELS**

Engineered to help move sweat away from your eyes and out through back of temples.

## DEL MAR COLLECTION

---

Sunglasses filled with fresh designs collected from our watery world. These acetate frames feature colors inspired by the abalone shells, golden sands and deep blue waves that fuel adventures on the water. And since they all come with 580 lenses, they're a great new way to See What's Out There®.

Explore the features that set this collection apart:

### **INTRICATE FILIGREE DETAILING**

Water inspired designs can be found in core wire detailing across all products within collection.

### **MINERAL GLASS**

Del Mar collection is offered exclusively in our mineral glass.

### **5 BARREL HINGES**

Reinforce premium positioning.

### **WATER INSPIRED DESIGN ELEMENTS**

Subtle designs connect our products back to the waters we were inspired by.

### **BIO-ACETATE**

All frames in our collection released after 2022 are constructed with Bio Acetate, marking one more step on our journey to reduce our impact on the places we love most.

**NEW 2024 SPRING - SUN**

# 6S9117 GRAND CATALINA

A Legend, remastered. Our legacy favorite Grand Catalina, introduced in the late 80's is now back and better than ever. Still sporting our beloved heritage aviator shape and removable side shields, we have updated the construction of this frame with Pathfinder Series DNA felt throughout. Sweat management channels, vented adjustable nose pads, removable side shields and seamless surfacing bring this retro inspired craft to the age of modern performance. With spring hinges and two different looks on offer- Grand Catalina is perfect for those looking to blend style, performance, and versatility. Dare we call this a quiver killer!?

# UNTANGLED COLLECTION

When you look through a pair of Costa Untangled sunglasses, you share our vision for healthy oceans. Discarded fishing nets are the most harmful form of plastic pollution in our oceans. But, in partnership with Bureo and Chilean fishermen, we're changing that. Made of either 97% or 100% recycled fishing nets, our Untangled collection of recycled frames comes in lifestyle and performance styles that are good looking and good for the ocean.

# 6S9083 ANTILLE

Named after the 1,500-mile Caribbean island chain, the Antille frame keeps its finger on the life pulse of the ocean. With a frame made from 97% recycled fishing nets, Antille is a great hybrid performance frame style with vented nose pads and additional coverage for your eyes, so they can spot the next island, reef or siesta spot, making it as good on the water as it is for it.

# 6S9086 PARGO

Pargo is the little brother to Santiago, but it doesn't need any help when it comes to fighting fish. Also called the Dog Snapper for their giant canine teeth and nasty attitude, Pargo rules the reefs. This frame is made from 97% recycled fishing nets with 3% performance additive for increased durability and performance on the water. With hooding and side shields, keeper-ready temples and Hydrolite® rubber, Pargo shows it's not the size of the dog in the fight but the size of the fight in the angler hooked up to the Dog Snapper.

# 6S9085 SANTIAGO

The Untangled frame style with the most coverage and “fishability” takes its name from Chile’s capital. Hooding and side shields help keep your eyes free from light leak and focused on the water. Keeper-ready temples and Hydrolite® rubber grips keep you fishing no matter how rough it gets out there. And to ensure a future full of fish for ours and future generations, Santiago is made from 97% recycled fishing nets. The other 3% is a performance additive that will help you catch 100% of the fish you chase. Santiago is as good for fishing as it is for our oceans.

# 6S9031 VICTORIA

The cateye styling of Victoria accents the coastal curves of the port city it was named after. Simple and delicate with rough outer edges, this frame is constructed from recycled fishing nets like those that ply in our world's oceans. These frames are part of The Untangled™ Collection made from Bureo® NetPlus™ and are 100% traceable and 100% recycled fishing nets.

RX-ABLE

A photograph of a sailboat on a body of water, with a mechanical component (likely a winch or part of the rigging) in the foreground. The background shows a hilly coastline under a cloudy sky. The text 'KING TIDE' is overlaid on the image.

# KING TIDE

The crowning achievement of 40 years on the water.  
Our most advanced frame to date.

## 6S9112 KING TIDE 6

In nature, a King Tide requires the perfect alignment of Earth and moon to create once-in-a-lifetime views and opportunities for watermen. Like their namesake, the King Tide 6 is designed to give you the ultimate advantage on the water. Made for watermen who demand performance in every sport, the King Tide 6 features a medium wrap with removable side shields for optimal viewing on and off water. Shark-inspired venting achieves a near impossible zero-fog effect. Top of the line sweat management and drains keep your view dry and unobstructed. Non-skid hooding means they stay in place on any surface wet or dry. All this has made King Tide 6 the crowning achievement of Costa's 40 years on the water, utilizing the research and innovations from every frame that came before it. Rule the water.

# PRO SERIES

Along with the polarized, color-enhancing 580<sup>®</sup> lens tech we're known for, the features we've added into these legendary Costa frames are designed to help anglers stay out even longer. It only takes one small change to catch more fish. So we added six. Sweat channels and eyewire drains are built into the frame designs, and side shields and hooding details are designed to help keep light and heat out. Our ventilated nose pads are fully adjustable for a customizable fit, and improved, lighter Hydrolite<sup>®</sup> adds comfort while keeping your frames on your face and in front of your eyes. Costa PRO Series. We sweat the details so you don't have to.

# 6S9078 BLACKFIN PRO

An enhanced version of one of Costa's most trusted and well-loved frames, the Blackfin PRO builds off the original look and fit with six new angler-approved additions to keep you on the water longer. Along with a vented and fully-adjustable nose pad for a custom fit, sweat channels and eyewire drains will keep your vision clear, while side shields, hooding, new stickier Hydrolite® and metal keeper slots keep your frames and your focus locked in.

# 6S9106 JOSE PRO

Costa brings next-level Pro-formance to its best-selling Jose frame. Named in honor of the legendary waterman and larger than life personality, Jose Wejebe, this frame builds off the original with six performance additions to help anglers manage sweat, reduce fogging and keep their frames locked in place, even when the water gets rough. Jose PRO celebrates the legacy of our friend and the man who broke barriers in the angling community and lived for the thrill of the bite. Fish it Forward with Jose PRO.

# 6S9007 REEFTON

With 12 different river systems less than an hour's drive from town, it's no wonder New Zealand's Reefton is world-renowned for its freshwater fishing. Reefton is the perfect companion to explore any body of water and will stay put on larger heads thanks to its co-molded temples, Hydrolite® nose pads and temples and cam action spring hinges.

A woman with long brown hair, wearing sunglasses and a white ribbed shirt, is smiling and looking towards the ocean. She is sitting on a blue and white striped beach chair. The background shows a rocky coastline with waves crashing against the shore under a clear blue sky.

# HYBRID

Champions of versatility. Designed with a broad water-based lifestyle in mind, the all-new Hybrid Waterman collection of sunglasses are the go-to styles for adventurers who want to spend less time checking the weather conditions and more time jumping right in.

# 6S9108 ALETA

Inspired by the form and function of nature's beauty, it's no coincidence the Aleta sunglasses get their name from the Spanish word for "fin." Offering water-ready performance in a stylish yet functional design, Aleta uses lightweight Bio-Resin and double-injected Hydrolite™ for a better grip. And with micro shields and hooding, excess light stays out while fog stays down with vented nose pads. Wearing Aleta, you'll see the smooth shape and refined lines that don't just stop at style. They're best enjoyed when on, in and near the water.

# DEL MAR COLLECTION

Sunglasses filled with fresh designs collected from our watery world. These acetate frames feature colors inspired by the abalone shells, golden sands and deep blue waves that fuel adventures on the water. And since they all come with 580 lenses, they're a great new way to See What's Out There®.

# 6S2005 ARANSAS

Named for the only town on Mustang Island where Spanish horses ran free, the four colorway options of the Aransas reflect a barrier island lifestyle. Like everything Texas, it features a large, acetate frame with a classic square lens shape and hand-crafted design elements. The Costa Aransas exude confidence and convey the lifestyle of salt in your hair and sand between your toes.

## 6S2008 ISLA

A true Mexican beauty, Isla Mujeres is known for its crystal-clear turquoise waters, whale sharks, diving and the white sand beaches of Playa Norte. Whether you're snorkeling, searching for the perfect margarita or posting up on the sand in the shade of a palm tree, you'll feel the elegance of Isla, a round-shaped acetate frame in vibrant colors inspired by the ocean and reef.

# 6S2013 KAILANO

The Kailano gets its name from a Hawaiian word for the sea, and it fits: With our newest 6-base frame, you'll be making waves — even on dry land. We've taken a classic Costa profile and amped it up with water-inspired temple design, a timeless keyhole bridge and simple, sturdy surfacing. It's the perfect choice for exploring coastlines or taking a load off. For all the times you're off or on the water, you can count on Kailano to be just like the sea: flowing, dependable and never predictable.

# 6S2009 MAY

The beaches of Cape May are rich in history and East Coast American flair. The Costa May is a women's acetate frame that comes in ocean-inspired colors reflective of its namesake; where the Delaware River meets the Atlantic Ocean. May has intelligent and sophisticated styling, like the iconic Victorian houses that line the shores of this destination coastal town.

# 6S2002 SULLIVAN

Those who have been to Sullivan’s Island know how to unwind. So naturally, Sullivan was designed with a slow-down, kick-back kind of style that still manages to grab attention along with its water-inspired acetate designs. Hit the beach, look out over the waves and leave the tension to your fishing line.

# 6S7001 BRINE READERS

For those with salt in their veins, Brine sunglasses are one of the most useful fishing tools in any tackle box. Hydrolite® temples, co-injected, co-molding technology and our storied 580® lens technology, these sunglasses deliver comfort and durability to anglers. Because to some, performance isn't just nice, it's necessary.

# 6S7008 TUNA ALLEY READERS

Named after the legendary 15-mile stretch of sand cutting through the deep blue Bahamian waters where the Bluefin tuna migrate north, these Costas were created to uncover and showcase the famous, underwater fish highway. With integral hinges, a signature venting system and Bio-Resin™ frames, these performance sunglasses won't miss much beneath the surf.

# Costas are made for those who need water to breathe

—the anglers, surfers, swimmers and explorers who have inspired us since 1983 to grow our tribe and push sunglass technology forward. It's a journey we couldn't make without you, and we're proud to have you on our next adventure. Let's fill our days and see where the tide takes us.

While the water has always guided our way, it's the company we've kept that we have to thank for where we are today.

To our customers, reps, retail sales associates, employees, pros, partners and loyal fans, and everyone who has experienced the beauty of our watery world through a pair of Costas:

**THANK YOU**

**FOR CALIFORNIA RESIDENTS:**

**WARNING:** The products in this catalog can expose you to chemicals including nickel, which is known to the State of California to cause cancer, and bisphenol A (BPA), which is known to the State of California to cause birth defects or other reproductive harm.
